

# AN INVESTOR'S WISDOM

There are two main players in stock market namely **INVESTORS** and **SPECULATORS**. **Who we are?** Have we ever thought over it?

**We all want to avoid market crashes** but fail to do so. We also want to invest at lowest level but do not find enough courage to do so when that level comes. **Why?** Have we ever thought over it?

The reason is very simple. **We are investors** but **confused investors**. Under confusions, we follow others and not the investment principle and we are also unaware of it. Look at this what we are doing under such confusions?

When the stock market is **CHEAP** it is termed as **KHARAB** by the other players. We follow them and in the process **avoid investing in a CHEAP** market. Similarly when the market is most **EXPENSIVE** it is termed as **ACHHA**. Here also we follow them and **avoid selling in an EXPENSIVE** market.

In this mad race of following others we are actually violating the most fundamental rule of wealth creation "**Buying in a cheap market & Selling in an expensive market**". Can't we reverse this and start buying in a cheap market and sell in an expensive market.

Friends, we are investors and not speculators. **We need to understand the market in relation to our identity**. We therefore, only need to see when the market is **CHEAP** and **EXPENSIVE**. All confusions will disappear once we vow to act according to our own identity and protect the same in all circumstances. **It is all about practicing investment religion in thoughts, words and deeds**.

Your one vow that you are a pure investor and resolve to act like a pure investor could change your fortunes. This is a matter of developing a habit of behaving like a true investor. Such habit can best be developed in the association of true practitioners of investment religion.

**With this objective we have formed a group TPIR** (True practitioners of investment religion) in order to facilitate people invest in mutual funds through the author Sri Kamal Singhi, AMFI registered MF distributor and manage the same according to the principle of buy **CHEAP**-sell **EXPENSIVE**.

**Knowledge for market's CHEAPNESS and EXPENSIVENESS has been discovered** and is available in our book. "Right Attitude to High Altitude-A 3D concept to win stock market".

**Knowledge when practiced bears fruits**. Knowledge remains a decorative item of a book only if it is not practiced in real life. This thought of ours, **have given birth to the formation of this group TPIR**.

**Now it is the test of your wisdom.**

You decide  
**Where the wisdom lies?**

**Integrity is our ornament, knowledge the strength and unbiased advice our image.**
